

## Durable panels for demanding marine applications

INNOLAST lightweight composite panels are a versatile product that can withstand the harshest weather and demanding environments needed for marine applications. Non-absorbent, resistant to decomposition and forceful impact, the INNOLAST panel is a safe and cost-effective sheet solution that requires little to no-maintenance. This combination of properties delivers consistent long-term performance over the lifespan of the product – ultimately reducing total overall costs.

INNOLAST lightweight composite panels are manufactured with high-performance polyethylene resins and are available in a wide range of vibrant UV stable colors.

### Applications

- Decking
- Hatch covers
- Seating
- Bulkheads and separating walls

### Attributes

- UV Stable
- Does not require painting
- Easily workable
- Environmentally stable, will not degrade or rot

### Finish

- Finish can be customizable and textured and colored

### Sustainable

- Panels are 100% recyclable

Contact your representative to learn how INNOLAST lightweight composite panels can add value to your marine applications.

## About Us

---

INNOLAST is the result of a collaborative effort between NOVA Chemicals and PolymerPark GmbH. INNOLAST lightweight composite panels deliver an innovative plywood replacement product. Polymer Park developed a highly innovative process and manufacturing technology, while NOVA Chemicals provided the material science expertise to achieve the desired balance of strength and stiffness.
