

## Durable panels for the most demanding recreational applications

An ideal solution for most indoor and outdoor recreational uses, INNOLAST™ lightweight composite panels are non-splintering, resistant to harsh elements, decomposition, forceful impact and can be repaired easily and quickly – making them a safe and cost-effective alternative to traditional materials. This combination of properties delivers long-term performance over the lifespan of the product – ultimately reducing overall costs.

Available in a wide range of vibrant UV stable colors, INNOLAST panels are manufactured with high-performance polyethylene resins and are suitable for a variety of recreation applications.

### Applications

- Playground equipment
- Skateboard ramps
- Ping pong tables
- Basketball backboards

### Attributes

- UV Stable
- Does not require painting
- Easily workable
- Environmentally stable, will not degrade or rot

### Finish

- Finish can be customizable and textured and colored

### Sustainable

- Panels are 100% recyclable

Contact your representative to learn how INNOLAST lightweight composite panels can add value to your recreation applications.

### About Us

---

INNOLAST is the result of a collaborative effort between NOVA Chemicals and PolymerPark GmbH. INNOLAST lightweight composite panels deliver an innovative plywood replacement product. Polymer Park developed a highly innovative process and manufacturing technology, while NOVA Chemicals provided the material science expertise to achieve the desired balance of strength and stiffness.
