

Countless opportunities with durable panels

INNOLAST lightweight composite panels replace plywood and other composite materials in a variety of applications by delivering long-term performance throughout their lifespan. Resistant to harsh elements, decomposition and forceful impact, the INNOLAST panel is a safe, non-splintering and cost-effective sheet solution. With characteristics similar to plywood; easily workable, with excellent nail and screw holding capability - the panel is ideal for industrial, agricultural and specialty markets.

INNOLAST lightweight composite panels are manufactured with high-performance polyethylene resins and are available in standard and Ultra-Strength grades in various thicknesses with a wide range of vibrant UV stable colors.

Applications

- Agriculture: Stable Partitions, Feeding Troughs
- Industrial: Reusable Packaging / pallets
- Signage
- Whiteboards

Attributes

- UV stable
- Does not require painting
- Easily workable
- Environmentally stable, will not degrade or rot

Finish

- Finish can be customizable and textured and colored

Sustainable

- Panels are 100% recyclable

Contact your representative to learn how INNOLAST lightweight composite panels can add value to your specialty applications.

About Us

INNOLAST is the result of a collaborative effort between NOVA Chemicals and PolymerPark GmbH. INNOLAST lightweight composite panels deliver an innovative plywood replacement product. Polymer Park developed a highly innovative process and manufacturing technology, while NOVA Chemicals provided the material science expertise to achieve the desired balance of strength and stiffness.
