

Durable panels increase lifespan of vehicles

Long-lasting INNOLAST lightweight composite panels provide a true alternative to conventional vehicle construction materials. Its lightweight properties deliver up to a 40% reduction in vehicle weight - immediately increasing payload capabilities and fuel efficiency. Impervious to moisture and chemically inert, the INNOLAST panels eliminate the potential for swelling and warping in moist and corrosive environments. This combination of properties delivers long-term performance over the lifespan of the product – ultimately reducing overall system costs.

Applications

- Sidewalls
- Trailer floors
- Storage bins

Attributes

- Capable of handling heavy loads
- Durable to handle abuse
- UV Stable
- Easily workable
- Environmentally stable, will not degrade or rot

Finish

- Finish can be customizable and textured

Sustainable

- Panels are 100% recyclable

INNOLAST Composite Panels are manufactured with high-performance polyethylene resins and are suitable for a variety of vehicle applications like trailer sidewalls and floors. Contact your representative to learn how INNOLAST lightweight composite panels can add value to your transportation applications.

About Us

INNOLAST is the result of a collaborative effort between NOVA Chemicals and PolymerPark GmbH. INNOLAST lightweight composite panels deliver an innovative plywood replacement product. Polymer Park developed a highly innovative process and manufacturing technology, while NOVA Chemicals provided the material science expertise to achieve the desired balance of strength and stiffness.
