

**Lightweight and durable panels manufactured for demanding commercial, industrial & consumer applications**

INNOLAST™ lightweight composite panels are an ideal replacement for plywood and other sheet materials in concrete forming, transportation, recreation, marine and many other applications. Resistant to harsh elements, decomposition and forceful impact, the INNOLAST panel is a safe and cost-effective sheet solution that delivers long-term performance, ultimately reducing overall system costs.

INNOLAST lightweight composite panels are manufactured with high-performance polyethylene resins and are available in standard and Ultra-Strength grades in a wide range of vibrant UV stable colors.

Markets and Applications	Benefits
<b>Concrete Forming:</b> Column, slab and wall forms	Lightweight
<b>Recreation:</b> Playgrounds and skate parks	Durable, stiff, repairable and will not delaminate
<b>Transportation:</b> trailers, RVs and commercial vehicles	Available in multiple colors, UV stable
<b>Marine:</b> Decking, storage bins, hatches	Chemically inert, will not absorb water or rot
<b>Specialty:</b> Agriculture, industrial, high-tech	Workable, will easily saw and hold nails and screws

Contact your representative to learn how INNOLAST lightweight composite panels can add value to your applications.

**About Us**

INNOLAST is the result of a collaborative effort between NOVA Chemicals and PolymerPark GmbH. INNOLAST lightweight composite panels deliver an innovative plywood replacement product. Polymer Park developed a highly innovative process and manufacturing technology, while NOVA Chemicals provided the material science expertise to achieve the desired balance of strength and stiffness.
